PROFESSIONAL SUMMARY

Software Engineering undergraduate specializing in Full Stack Development with expertise in Java, Python, React.js, Next.js, Flask, MySQL, and RESTful APIs. Built scalable web applications, enterprise dashboards, and real-time systems with focus on clean architecture, DSA, OOP, DBMS, and performance optimization.

TECHNICAL SKILLS

- Languages: Java, Python, C++, SQL, Kotlin, JavaScript
- Frontend: ReactJS, Next.js, HTML, CSS, Tailwind CSS
- Backend & Frameworks: Flask, Node.js (Basics), REST APIs, WebSockets
- Developer Tools: Git, GitHub, VS Code, Android Studio, AWS, OpenCV
- Core Competencies: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design
- Languages Known: Hindi (Native), English (Native), Japanese (Beginner)

EXPERIENCE & PROJECTS

Lambardar Developers — Enterprise Employee Portal | Next.js, Framer Motion, Full Stack

GitHub: <https://github.com/nitya325/gopala-srinivasam-portal>

- Developing a full-stack enterprise portal for the GOPALA SRINAVASAM real estate project with employee management and operations dashboards.
- Built a modular React/Next.js architecture using reusable components and REST API integration.
- Implemented secure authentication, role-based access control, and ledger management workflows.
- Developed responsive, scalable dashboards using Tailwind CSS and Framer Motion.

Remote YouTube Monitor & Controller | Flask, WebSockets | Full-Stack

GitHub: <https://github.com/nitya325/youtube-controller>

- Architected a real-time monitoring and control system using Flask, WebSockets, and Chrome Extensions.
- Enabled low-latency cross-device interaction and remote synchronization features.

Facial Recognition System | Python, OpenCV | Computer Vision

GitHub: https://github.com/nitya325/ram_face_recog

- Built a robust facial recognition module supporting both static image processing and live webcam identification.
- Trained models on large-scale datasets for reliable performance across varying environments.

Blood Donation App | Kotlin, Android Studio | Mobile Development

GitHub: https://github.com/nitya325/Blood_Sync_App

- Designed an Android application for emergency blood donation and hospital navigation.
- Integrated emergency alert broadcasting for nearby hospitals and donors.

EDUCATION

VIT Bhopal University

B.Tech in Computer Science and Cyber Security | CGPA: 8.79

Ahlcon Heights School / St. Joseph's Convent

Class XII: 83.8% | Class X: 93.6% (CBSE)

CERTIFICATIONS & ACHIEVEMENTS

- AWS Technical Essentials
- Blockchain & Its Applications (NPTEL)
- Programming in Java & Python
- Introduction to AI/ML
- Computer Networking (Coursera)
