PROFESSIONAL SUMMARY

Full Stack and Software Development enthusiast with hands-on experience in ReactJS, Next.js, Flask, Java, Python, MySQL, and Kotlin. Built scalable web applications, secure enterprise dashboards, real-time systems, and machine learning solutions with a strong focus on performance optimization and clean architecture. Experienced in frontend engineering, backend integration, REST APIs, and modern UI/UX development. Strong problem-solving skills with expertise in Data Structures and Algorithms, making me well-suited for high-performance product engineering roles.

TECHNICAL SKILLS

- Languages: Java, Python, C++, SQL, Kotlin, JavaScript, HTML, CSS
- Frontend: ReactJS, Next.js, HTML5, CSS3, Tailwind CSS
- Backend & Frameworks: Flask, Node.js (Basics), REST APIs, WebSockets
- Developer Tools: Git, GitHub, VS Code, Android Studio, AWS, OpenCV
- Core Competencies: Data Structures & Algorithms (DSA), System Design, Machine Learning, Cyber Security, UI/UX Design
- Languages Known: Hindi (Native), English (Native), Japanese (Beginner)

EXPERIENCE & PROJECTS

Lambardar Developers — Enterprise Employee Portal | Next.js, Framer Motion, Full Stack

- Built a secure enterprise management dashboard for the GOPALA SRINAVASAM real estate project with optimized component architecture.
- Implemented modular UI rendering and static configuration isolation to improve maintainability and reduce boilerplate overhead.
- Engineered custom Framer Motion stagger animations and responsive layouts for premium UI/UX experience.
- Developed authentication workflows, operations ledger tracking, and quick-action routing modules.

Remote YouTube Monitor & Controller | Flask, WebSockets | Full-Stack

- Architected a real-time monitoring and control system using Flask, WebSockets, and Chrome Extensions.
- Enabled low-latency cross-device interaction and remote synchronization features.

Facial Recognition System | Python, OpenCV | Computer Vision

- Built a robust facial recognition module supporting both static image processing and live webcam identification.
- Trained models on large-scale datasets for reliable performance across varying environments.

Blood Donation App | Kotlin, Android Studio | Mobile Development

- Designed an Android application for emergency blood donation and hospital navigation.
- Integrated emergency alert broadcasting for nearby hospitals and donors.

EDUCATION

VIT Bhopal University

B.Tech in Computer Science and Cyber Security | CGPA: 8.77

Ahlcon Heights School / St. Joseph's Convent

Class XII: 83.8% | Class X: 93.6% (CBSE)

CERTIFICATIONS & ACHIEVEMENTS

- AWS Technical Essentials – Cloud infrastructure and serverless architecture.
- Blockchain & Its Applications (NPTEL) – Smart contracts and decentralized systems.
- Programming in Java & Python (VITyarthi) – Advanced application logic and DSA.
- Introduction to AI/ML (VITyarthi) – Predictive modeling and neural network fundamentals.
- Computer Networking (Coursera) – TCP/IP protocols and network security.
